

How to set up Pidgin to use Google Talk through the UNE Proxy (1/2)

Select Accounts -> Add/Edit

Select Add

Select Google Talk as the Protocol

Enter your Google Account name into the Screen name field

Enter 'Home' into the Resource field

Enter your Google Account password into the Password field

Enter an alias into the Local alias field. This will identify you in your conversation windows

How to set up Pidgin to use Google Talk through the UNE Proxy (2/2)

The screenshot shows the 'Advanced' tab of the Pidgin configuration window. Under 'XMPP Options', the 'Require SSL/TLS' and 'Force old (port 5223) SSL' checkboxes are checked. The 'Connect port' field contains '443', 'Connect server' contains 'talk.google.com', and 'File transfer proxies' contains 'proxy.jabber.org'. Under 'Proxy Options', the 'Proxy type' dropdown is set to 'HTTP', 'Host' is 'proxy.une.edu.au', 'Port' is '8080', 'Username' is 'username', and 'Password' is masked with dots. 'Cancel' and 'Add' buttons are at the bottom.

Check the 'Require SSL/TLS' box

Check the 'Force old SSL' box

Enter '443' into the Connect Port field

Enter 'talk.google.com' into the Connect Server field

Select 'HTTP' as the Proxy type

Enter proxy.une.edu.au as the Host

Enter 8080 as the Port

Enter your UNE username as the Username

Enter your UNE password as the Password
